 REF. CHINA VSTC: VSTC0757
 REF. RUSSIA TC: CT316-A119

It has come to Dart's attention that in an emergency situation, the threads on the thru bolts that fasten the skidtube saddles to the DART Crosstubes and the threads on the MS21920-XX Clamps securing the steps and damper supports may prove to be a hazard when deploying the float system and may puncture the float bags.

The purpose of this Dart Service Bulletin is to inform operators with float systems installed in conjunction with DART D119-796-101/-201/-103/-203 Crosstubes that they must obtain and install the D119-796-015 Float Protection Kit per Dart Service Instruction DSI 9756 and reposition the MS21920-XX Clamps per Dart Service Instruction DSI 9753 as soon as possible.
